SENIOR CLOUD CONSULTANT | DEVOPS ENGINEER | DEVSECOPS FOCUS

PROFESSIONAL SUMMARY:

Certified AWS Solutions Architect Associate with 6+ years of experience in Cloud and DevOps Engineering, specializing in AWS, Kubernetes and OpenShift platforms. Skilled in designing and automating secure cloud infrastructure, CI/CD pipelines and software development life cycle (SDLC) processes with exposure to java-based development teams. Adept in implementing PaaS solutions, embedding TDD and test automation practices and aligning with risk and controls frameworks to deliver scalable, secure and customer focused cloud solutions.

Certifications:

AWS Certified Solutions Architect Associate || AWS Certified Cloud Practitioner || Hashicorp Terraform Associate || ITIL v4 Foundation

Technical Skills:

Cloud Platforms: AWS || IAC: Terraform, Cloud Formation || CI/CD: Azure DevOps, Jenkins and Github Actions (Basic)|| Configuration Management: Ansible || Containers & Orchestration: Docker, Kubernetes, ECS, EKS || Monitoring: CloudWatch, Prometheus, Grafana, AppDynamics, Splunk || Security: IAM, WAF, SAST integration, SSL cert automation, Governance and Compliance IM8, VAPT || Scripting: Python, Bash, Shell || OS: Linux (Red Hat, CentOS, Ubuntu), Windows ||

PROFESSIONAL EXPERIENCE

Sr. DevOps Engineer ▶ Loginet Solutions | TransformCx (Contract)

May 2024 – Present

- **Client Support & Collaboration:** Spearhead support for the esteemed client **Johnnie Walker** as a DevOps Engineer, ensuring seamless operational excellence.
- **Infrastructure Setup & Maintenance:** Engineer and optimize the AWS infrastructure for the extended Johnnie Walker brand, establishing a robust foundation for scalability and reliability.
- **ECS Cluster Configuration:** Configure and manage ECS clusters with multiple services utilizing Fargate and administer the ECR repository to enhance container management and deployment.
- **Database Management:** Orchestrated setup of RDS databases for SQL, executing seamless database migration across accounts.
- **CI/CD Pipeline Development:** Architected and implemented scalable CI/CD pipelines using Azure DevOps to automate build, test, and deployment workflows, reducing release cycle time and enhancing delivery reliability. Integrated security gates with tools like SonarQube and Trivy (SAST) to enforce secure coding standards and ensure vulnerability-free deployments for .Net Applications.
- **Non-Production Migration:** Led migration of non-production environments from one account to another, ensuring minimal disruption.
- **Docker Configuration:** Configure Docker images and task definitions for ECS, facilitating the deployment of updates and enhancing application performance.
- **Application Monitoring:** Established comprehensive application monitoring through CloudWatch Synthetics and integrated dashboards using Grafana for visualizing key health metrics, enabling proactive detection and resolution of potential issues.
- **Automated Monitoring Solutions:** Developed automated monitoring for ECS task failures using AWS Lambda, CloudWatch improving incident response and service resilience.
- **Error Monitoring:** Implemented detailed service error tracking with CloudWatch and Lambda, and began incorporating Prometheus to enable granular log and metric analysis across distributed services.
- **Infrastructure Deployment:** Execute setup of infrastructure using CloudFormation stacks, deploying reliable and scalable solutions for .Net Application. Embedded Trivy scans into CI/CD pipelines to block vulnerable container images from deployment.

Sr. Cloud Consultant ▶ NCS PTE LTD via (IT CAN Consultancy)

Mar. 2023 – Jan 2024

- **Multi-Cloud Implementation:** Orchestrate multi-cloud environments on AWS and Azure, tailoring services to meet specific client needs.
- **Patching and Maintenance:** Spearhead production and non-production patching operations for both Windows and Linux machines, guaranteeing optimal system performance and security compliance.
- **AWS Management:** Configure and maintain diverse AWS services, including EC2, S3, Route53, IAM, VPC, RDS, CloudWatch, WAF & Shield, and AWS Lambda, Ensure robust and reliable cloud infrastructure.
- **Disaster Recovery:** Designed and implemented automated multi-AZ Failover strategies using AWS Route53 and Elastic Load Balancer for high Availability. Developed automated RDS Snapshots and AMI Backups using Lambda and Cloud watch events to support DR.
- **Splunk Monitoring:** Configured Splunk dashboards for AWS servers and CloudTrail events, centralizing log monitoring and compliance reporting.
 - Automated CloudWatch → Splunk log integration, enabling proactive incident response and root cause analysis.
 - Utilized AWS Security Hub to aggregate Guard Duty, IAM Access Analyzer, and Inspector findings, integrating with Splunk for compliance monitoring.

- **Infrastructure Delivery and Transition:** Lead the implementation of essential infrastructure components, delivering seamless handovers to application teams during Day One and Day Two transitions.
- **Technical Documentation and Analysis:** Produce technical documents outlining infrastructure and deployment methodologies, conducted detailed Root Cause Analyses (RCA),
- **Collaborative Application Team Support:** Facilitate coordination with offshore application teams, providing expert guidance and support throughout all project phases.

Problems and solution provided

- **Services used:** AWS Lambda function, Event Bridge, Cloud Watch, IAM Roles, Python
- Implemented a proactive SSL certificate management system using AWS Lambda, Event Bridge, and CloudWatch, reducing risk of application downtime due to certificate expiry.
- Developed an automated alert mechanism, triggering emails to the team 45 days before expiration, allowing timely renewal integration of new certificates into the Load Balancer.
- Successfully achieved zero downtime incidents, showcasing a proactive and preventive approach to infrastructure management.

Clients Handled/Supported

- **National Heritage Board (NHB):** Led the design and configuration of AWS infrastructure using Terraform, actively contributing to both Day 1 and Day 2 Operations for the National Heritage Board.
- Ensured the scalability and reliability of client applications by implementing best practices in AWS infrastructure design, optimizing performance, and enhancing overall system efficiency.

Department of State (DOS) and Jurong Town Corporation (JTC):

- Managed Day 2 Operations for DOS and JTC, adeptly handling JIRA tickets raised by the application team, demonstrating a strong commitment to issue resolution and system optimization.
- Proactively identified and addressed infrastructure-related challenges, ensuring the uninterrupted operation of critical applications and providing responsive solutions to enhance overall system performance.

DevOps Engineer ▶ Opteamix India Business Solutions Pt. Ltd.

Aug. 2020 – Mar. 2023

- **Cloud & Application Support:** Managed support activities for AWS and Java applications hosted on Pivotal & Apache Tomcat, resolving incidents, including troubleshooting, connectivity issues, & application administration.
- **Infrastructure Automation and Management:** Controlled infrastructure automation, creating and managing templates using CloudFormation (CFT).
- **AWS Services Configuration:** Managed and configured AWS services tailored to business requirements, including ELB, S3, CloudWatch, IAM, and VPC.
- **Tomcat Application:** Deployed, managed, and configured Tomcat applications, performing upgrades and configurations using Ansible and manual methods. Proficient in deploying War/Jar files through Jenkins and manual processes.
- **Troubleshooting and Log Analysis:** Troubleshoot based on logs and activities in Unix-flavored OS. Managed capacity, CPU, heap, and memory in Linux servers.
 - Implemented CloudTrail-based monitoring and IAM policy reviews to detect and mitigate unusual activity in AWS accounts.
- **Application Performance Management:** Installed, configured, and managed AppDynamics to monitor and optimize application performance, ensuring efficient functioning and quick issue resolution.

Associate ▶ Sutherland Global Services | Client: Amazon

Jun. 2019 - May 2020

Environment: AWS, EC2, S3, ELB, IAM, VPC, JENKINS, ANSIBLE, LINUX

- **AWS Cloud Infrastructure Management:** Managed AWS EC2 cloud instances, VPC setups, and configurations, ensuring seamless operation of EC2, S3, and ELB services.
- **Proactive Monitoring and Incident Management:** Implemented robust monitoring using AWS CloudWatch, promptly creating and managing incidents.
- **Deployment Coordination and Stakeholder Collaboration:** Led deployment coordination efforts, collaborating effectively with diverse stakeholders. Conducted post-release application checkouts.
- **Scripting and Support Ticketing:** Demonstrated scripting proficiency in Bash and Python, enhancing automation capabilities. Managed L1 & L2 support activities, expertly creating, closing, and resolving ServiceNow tickets across various environments.
- **Conflict Resolution:** Participated in 24/7 on-call support, promptly addressing and resolving critical incidents to ensure the continuous availability and functionality of essential systems.

EDUCATION CREDENTIALS

Bachelor of Engineering in Computer Science | B S Abdur Rahman Crescent Institute of Science and Technology, Chennai **2015 - 2019**
